Letter of support

EVC aims to support networks of young artists and promotes appropriate initiatives.

The new initiative described in the application, started by artists from Cameroon, Ghana, Brazil, Kenya, South Africa and Germany, is a very good sign that exchange of ideas and arts in the global context is progressing.

I am proud that in August 2022 the initiators established their cooperation in a residency and an international summer university on transmedial storytelling in Karnitz/Mecklenburg. Artistic research on the big question of "Narratives of the Anthropocene" took place. It was a fitting correspondence to the previous EVC Summer School at documenta fifteen.

It is therefore obvious that we are very happy not only to support the initiative but also to take over an active and responsible role. We are just as happy to contribute our scientific and artistic expertise as we are to provide the location, the material and the technology for the work regarding the presentations of the exhibition in Germany.

Best wishes

Dr Joachim Borner
Director of the KMGNE
